

SIGNET SOLAR GmbH PRESS RELEASE (ENGLISH TRANSLATION)

Dresden 07. March 2008

SIGNET SOLAR AND GOLDBECK SOLAR SIGN "LETTER OF INTENT" (LOI)

Thin film module manufacturer Signet Solar signs letter of intent (LOI) to supply silicon thin film solar photovoltaic modules with Solar System Integrator Goldbeck Solar

Signet Solar and Goldbeck Solar announced today that both companies have signed a Letter of Intent (LOI) for the delivery of thin film solar modules over the next two years with a total output of 6 MWp. Goldbeck Solar will install the modules in its own photovoltaic projects.

"In Goldbeck Solar we have an experienced solar photovoltaic partner. Among others, the company specializes in commercial roof top installations," said Gunter Ziegenbalg, Managing Director of Signet Solar GmbH. "For these types of applications our solar PV modules available in different sizes are ideal. For this reason we intend to partner with Goldbeck Solar to install a 250kW solar PV system on the rooftop of Signets manufacturing plant in Mochau."

For solar photovoltaic integrator, Goldbeck Solar, a subsidiary of the global construction and services group GOLDBECK, this Letter of Intent is an important step in extending its product portfolio. "Signet Solar offers thin film solar modules with a low temperature coefficient and a state of the art manufacturing process. These modules are especially suited for solar farms in regions where the cost of land is low," explained Joachim Goldbeck, CEO of Goldbeck Solar.

About Signet Solar:

Signet Solar, Inc. is a global company established in 2006 to bring Clean Affordable Renewable Energy™ to people and countries worldwide. Headquartered in Menlo Park, California, the company has been founded to design, develop, manufacture and market thin film silicon photovoltaic modules.
